PROFIILE

I'm a React and Flutter developer with experience building both web and mobile applications. I enjoy turning ideas into working projects, improving UIs, and learning new technologies along the way. I have hands-on experience with Next.js, Flutter, and modern front-end tools, and I focus on writing clean, maintainable code while delivering user-friendly apps.

WORK EXPERIENCE

Quick Biter

July 2025 - Present

React Developer

At Quick Bite, I focused on rebuilding web pages to ensure full mobile responsiveness while enhancing UI/UX. I developed reusable components for products, checkout, and user accounts, added smooth animations, and optimized rendering performance, collaborating closely with designers and backend developers to deliver a polished product.

Quick Bite

Nov 2023 - Jun 2025

Flutter Developer

I worked on the mobile app, implementing user authentication, real-time updates, and order management features. My responsibilities included integrating REST APIs, refining UI components, and maintaining the codebase. Additionally, I implemented background geolocation and push notifications to improve the user experience.

Quick Bite

Aug 2023 - Oct 2023

QA Engineer

During this period, I performed manual testing across devices, validated app features, and documented bugs. My efforts helped improve UI/UX consistency and ensured a more stable and reliable app.

AQ Wise

Oct 2021 - Apr 2022

Flutter Trainee

As a trainee, I built Flutter UI screens, practiced responsive design, and learned state management and API integration. I collaborated with senior developers and participated in code reviews to strengthen my development skills.

EDUCATION

TARC University College
2019 - 2022

Bachelor of in Information Technology (Software Systems Development)

During my studies, I focused on software development, learning programming, system design, and application development. I gained hands-on experience building software projects and strengthened my problem-solving and technical skills in real-world scenarios.

PROJECTS

Eloria
2025

Full-featured E-commerce App

Technologies: Next.js, Supabase, JS, Tailwind CSS

Developed a full-featured e-commerce web application using Next.js, Supabase, and Tailwind CSS. Implemented product listings with search and filter functionality, user authentication, shopping cart, wishlist, and responsive design for seamless user experience across devices.
