

Dania Rachid

Frontend Developer — React / Next.js

Istanbul, Turkey (Remote) · +90 537 851 7278 · danialrachidd@gmail.com · [Portfolio](#)

SUMMARY

Frontend developer with professional experience building React and Next.js interfaces, backed by a software engineering background across mobile development and QA. Built full-stack applications independently using Next.js and Supabase, including authentication, APIs, real-time features, and payment workflows.

WORK EXPERIENCE

Quick Bite *Aug 2023 – Dec 2025*

Frontend Developer (React / Next.js) — *Jul 2025 – Dec 2025*

- Rebuilt the landing page and core web pages in Next.js and React across multiple UI iterations, including a full mobile-responsive redesign of a site that previously had no mobile support.
- Implemented ASAP ordering and scheduled ordering end-to-end, including the address, date, and time selection flow.
- Debugged and resolved an issue causing the order details page to display the incorrect distribution method.
- Built reusable components for checkout and account flows, and added UI animations across multiple sections of the site.

Mobile Developer (Flutter) — *Nov 2023 – Jun 2025*

- Performed ongoing UI enhancements and bug fixes across the company's Flutter-based restaurant app.
- Built and maintained mobile features including authentication, real-time order updates, and order management.
- Implemented background geolocation tracking and push notifications.

QA Engineer — *Aug 2023 – Oct 2023*

- Performed manual cross-device testing ahead of feature releases, documenting and tracking defects to support release stability.
- Discussed testing findings and release readiness with the development team ahead of launches.

AQ Wise — Flutter Trainee *Oct 2021 – Apr 2022*

- Built responsive UI screens in Flutter and practiced state management, API integration, and code review as part of a development team.

PROJECTS

Eloria — Full-Stack E-Commerce Platform

Next.js (App Router), Supabase, TypeScript/JavaScript, Tailwind CSS, Stripe, Zustand

- Independently built a full-stack e-commerce application with product search and filtering, cart, and wishlist functionality.
- Implemented authentication and integrated Stripe Checkout for payment processing and order confirmation.
- Built a responsive UI with global state managed via Zustand.

[Live Demo](#) · [GitHub](#)

Bite Link — Group Food Ordering Platform

Next.js, Supabase (incl. Realtime), TypeScript/JavaScript, Tailwind CSS, Stripe

- Built a host-managed group ordering platform where participants create individual carts that sync in real time via Supabase Realtime, allowing the host to lock the combined order and complete payment.
- Implemented Google OAuth and email authentication via Supabase Auth.
- Built order tracking and order history backed by PostgreSQL.
- Integrated Stripe payments with webhook-based order processing.

TECHNICAL SKILLS

Frontend: React, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5/CSS3

State Management: Zustand, React Context

Backend / Data: Supabase, PostgreSQL, REST APIs

Integration: Authentication, API Integration, Webhooks

Tooling: Git/GitHub, Vercel, Postman

Other: Flutter/Dart (mobile)

EDUCATION

Bachelor of Information Technology (Software Systems Development)

TARC University College — 2019 – 2022
